OF ASI

## Welcome Note

Dear Colleagues,

We have great pleasure and honor in inviting you to the 16th National Conference and live workshop of the Indian Hernia Society (IHS). "IHSCON 2024" at Ranchi, Jharkhand. The conference is scheduled to take place on Thursday and Friday, 13th and 14th February 2025. The purpose of this conference is to make the surgeons and surgical trainees aware of the latest developments. In technique, skill, and challenges in the repair of all types of Hernia and to give an insight on the latest and upcoming developments. A series of Lectures, videos, and Live Workshops from eminent surgeons of National and International fame will be the highlights of this one and a half-day academic feast.

Ranchi, the vibrant capital city of Jharkhand, is proud to host this prestigious conference. Nestled in the Chotanagpur Plateau, Ranchi is renowned for its lush green landscapes, waterfalls, and pleasant climate, making it a perfect destination to rejuvenate while engaging in fruitful discussions and knowledge-sharing. As the city continues to evolve as a hub for education, healthcare, and industry, Ranchi offers a blend of traditional charm and modern infrastructure.

Beyond the conference, we encourage you to explore the scenic beauty and rich cultural heritage that the city has to offer. We at Orchid Medical Centre are privileged to have this opportunity of hosting this grand academic event. We sincerely hope you have a productive and enjoyable time at the conference and a memorable stay in Ranchi. We look forward to welcoming you at the 16th IHSCON 2025, Ranchi.

**Organizing Chairman**  
*Dr Shambhu Pd Singh*

**Organizing Secretary**  
*Dr Geeta Prasad*

**Treasurer**  
*Dr Ranjan Kumar*

## Message from Prof. M C Misra

**Prof. M C Misra**  
Founder President  
Indian Hernia Society

It is extremely heartening to note that Dr Shambhu Pd Singh and Dr Geeta Prasad accepted a request to organize the 16th, Annual National Conference of the Indian Hernia Society - IHSCON 2025 in February at Ranch, Jharkhand.

Hernia repair has taken centre stage over the last decade, particularly with the advent of Minimally Access techniques coming into vogue. Both groin hernia surgery, as well as ventral/ incisional hernia repair, are performed in large numbers by a variety of procedures. There have been recent awakenings about the various techniques for the repair of groin hernia with the standardization of endoscopic repairs. Abdominal wall Reconstruction has also taken centre stage with the focus on component separation with particular attention on posterior component separation, using Transversus Abdominis Release (TAR).

There is also an inclination towards eTEP (Enhanced View) for groin hernia, and the same technique of eTEP helps to learn endoscopic abdominal wall reconstruction using TAR for complex and recurrent incisional and ventral hernias. More and more experience with these techniques is being shared in various live operative workshops and conferences, and additionally, data is being published in current literature.

Groin hernia repair is one of the most common general surgical procedures performed by General Surgeons. Over 700,000 groin hernia repairs are performed each year in the USA alone. The exact number in India is not known, but according to conservative estimates, more than 400,000 repairs are done each year in India. Open hernia repair continues to dominate and is associated with significant morbidity if not performed by properly trained surgeons. Open hernia repair is the first elective operation performed by surgical trainees. To focus on surgical treatment of hernia, Shouldice Technique, Lichtenstein, laparoscopic (TEP & TAPP) repairs, and different techniques of incisional and vitral hernias can be demonstrated and discussed.

Ventral/Incisional hernia repair is the next common hernia performed by a general surgeon. In the USA alone, over 90,000 incisional hernia repairs are done each year. In India, there is no definite data, but more than one lakh, 1,50,000 repairs might be performed according to conservative estimates. Sutured repair is associated with high recurrence rates (as high as 60%). Recurrence rates have significantly come down with prosthetic repair. Lately, Laparoscopic repair of ventral/incisional hernia repair has become the standard of care due to overwhelming advantages in terms of reduced postoperative complications and recurrence. IHSCON 2025 will focus on various aspects of laparoscopic and conventional repair of ventral/incisional hernia.

I welcome you all for active participation during the CME, Conference and live operative workshop on various techniques for inguinal and ventral/incisional hernia repair. There shall be free papers and panel discussions covering various aspects of hernia repair. I am certain that the dynamic team of Jharkhand will put up an absorbing scientific program, a live operative workshop, and wonderful hospitality.

On behalf of the organizing committee, we extend a heartfelt invitation to one and all.

This will be a grand event in Surgical Laparoscopy with the participation of delegates from all over India. We have learned reputed faculty from India are expected to actively participate in this event.

We thank you for your wholehearted support to Team Ranchi for organizing IHSCON 2025.

The conference and Live Operative Workshop will focus on laparoscopic and open repair of inguinal and ventral/incisional hernias.

With all best wishes and greetings, I welcome one and all to the City of Ranchi.

## Message from Indian Hernia Society

Dear Esteemed Members and Delegates,

Warm greetings from the Indian Hernia Society.

We are excited to meet you all in person for IHSCON 2025, to be held in Ranchi in February 2025. Hernia surgery remains a cornerstone of a surgeon's practice. However, despite its frequency, it is a field that demands a deep understanding of its complexities before undertaking this vital surgical discipline. Mastery of anatomy, physiology, and the latest operative techniques is essential to achieving successful outcomes. The Indian Hernia Society is dedicated to fostering excellence in this field through education and training.

We invite you to the 16th Annual Conference of the Indian Hernia Society in Ranchi. The scientific program has been meticulously planned, featuring a two-day live operative workshop conducted by leading experts in hernia surgery, alongside orations, panel discussions, master video sessions, keynote lectures, and a PG master class.

The organizing team of IHSCON 2025, led by the dynamic Dr Shambhu Pd Singh and Dr Geeta Prasad, deserves appreciation for their diligent efforts in putting together this event. We are confident that they will ensure a memorable experience with enriching scientific content, as well as opportunities for camaraderie and enjoyment during the gala evening.

We warmly welcome you to the conference and wish it a resounding success.

*Dr (Prof.) Devinder Pal Singh*  
President, IHS (2024)

*Dr Asuri Krishna*  
Secretary, IHS

## Message from Dr (Prof) V K Bansal

*Dr (Prof.) Virinder Kumar Bansal*  
Past President,  
Indian Hernia Society, 2023

It is a matter of great honour for the Surgical Fraternity of Ranchi and the Department of Surgery, Orchid Medical Centre, Ranchi for being entrusted with the responsibility of organizing the 16th Annual National Conference of Indian Hernia Society - IHSCON 2025.

The Surgical Fraternity of Ranchi has always been enthusiastic about organising academic events and Live Operative Workshops.

Despite the paucity of time this time, I am confident that under the leadership of Dr Shambhu Prasad Singh, and the dynamic efforts of Dr Geeta Prasad and her team, IHSCON 2025 will be an academic event par excellence.

On behalf of the Organizing Team of IHSCON 2025, I take the privilege of inviting all of you to be a part of this Surgical Fest on Hernia on 13th & 14th February 2025.

My best wishes to the organizing team for a very successful IHSCON 2025.
